

ROHIT NAVGHARE

Nagpur, Maharashtra-441110 | +91 9021406469 | rohitnavghare41@gmail.com

OBJECTIVE

As a motivated and dedicated individual, I am seeking a trainee position in AWS, Linux, and DevOps to leverage my passion for cloud computing, system administration, and automation. I aim to contribute my enthusiasm for learning and strong problem-solving skills to a dynamic team, while further developing my expertise in cutting-edge technologies.

EXPERIENCE

Trainee Consultant – Linux, Devops, Aws *INFORMATRIX IT SOLUTION PVT LTD*

(Jan 2023 – June 2023)

- Installed and configured various Linux distributions, ensuring optimal performance and security.
- Implemented and fine-tuned the booting process for faster startup. Configured and monitored security policies to protect against unauthorized access.
- Managed timely application of OS patches and updates to keep systems up-to-date. Created and managed user accounts with appropriate permissions.
- Set up and maintained file and directory permissions to restrict unauthorized access. Configured and managed SELinux policies to enforce additional security measures.
- Managed sudo permissions to control access to privileged commands.
- Utilized Yum/DNF for package installation, removal, and updates.
- Implemented firewalld to control incoming and outgoing traffic.
- Configured IP addresses, virtual interfaces, and implemented Linux bonding for network redundancy. Implemented log rotation and retention policies.
- Utilized Satellite and Spacewalk tools for centralized management of software updates. Implemented Nagios for monitoring system performance and availability.
- Utilized Ansible for automation of routine tasks, ensuring consistency across servers. Conducted root cause analysis for recurring issues.
- Configured and managed various network protocols including DNS, DHCP, FTP, NFS, SMB, HTTP, HTTPS, SMTP, POP, IMAP, Telnet, SSH, IMP, TCP/UDP.
- Implemented and managed services using systemctl commands for start, stop, enable, and disable operations.
- Launching Amazon EC2 Cloud Instances using Amazon Web Services (Linux) and configuring launched instances with respect to specific applications.
- Managing Continuous Integration, Continuous Delivery pipeline using Jenkins declarative pipeline.
- Create and maintain fully automated CI/CD pipelines for code deployment. Automated build and deployment using Jenkins to reduce human error and speed up production processes. Identify root causes and resolve problems.

PROJECT

THREE-TIER ARCHITECTURE

Enthusiastic IT professional with expertise in AWS, Linux, and web deployment. Successfully orchestrated a three-tier architecture on AWS using EC2 instances, configuring Apache Tomcat for web hosting, MySQL for data management, and ensuring secure HTTP communication. Demonstrated proficiency in system administration, scalability, and high availability, showcasing a robust foundation in cloud-based web application deployment.

SKILLS

Linux administrator | Aws Cloud | Git | Docker | Ansible configuration | Jenkins CI CD pipeline | Tomcat Configuration | Nagios Monitoring.
